**RE: Joshua Falls–Yeat 765 kilovolt (kV) Electric Transmission Line Project**

Dear Neighbor,

You are receiving this letter because your property is located near a potential route for the proposed Joshua Falls–Yeat 765 kV Electric Transmission Line Project. Your input matters to us and we are writing to you today to involve you as we develop this project.

Developed by Valley Link—a joint venture between Dominion Energy, Transource (jointly owned by American Electric Power and Evergy) and FirstEnergy Transmission—the Joshua Falls–Yeat 765 kV Electric Transmission Line Project represents a collaborative, forward-looking solution to help address the region's rapidly growing demand for electricity, strengthen the reliability of the electric grid for all customers and ensure energy security for an increasingly dynamic economy.

The Joshua Falls–Yeat project proposes construction of an approximately 115-mile, 765 kV electric transmission line connecting the existing Joshua Falls substation in Campbell County, Virginia to a proposed new substation in Culpeper County, Virginia. 765 kV transmission presents a long-term, durable solution designed to deliver bulk power across the electric grid, serving homes, businesses and critical community services throughout the Commonwealth.

As we plan for and refine transmission line routing and other considerations, your feedback and input are crucial to help us ensure we design a project that takes into account what's important to your community and minimizes impacts to the greatest extent possible. You are invited to attend a community meeting in your area to meet with the Joshua Falls–Yeat project team, learn about the project, ask questions and provide feedback. Our team is planning multiple community meetings, and we invite you to attend the one(s) which best fits with your schedule and location.

---

A JOINT VENTURE OF

---

*In the event of inclement weather, meeting updates or postponements will be posted at [www.vltransmission.com](http://www.vltransmission.com) or available by calling (855) 617-6107.*

The project is currently in the early stages of development. As part of this process, Valley Link will study potential transmission line routes and conduct surveys to identify environmental, cultural and historic resources, as well as any threatened or endangered species. Feedback from landowners and community members will help inform route development before proposed routes are submitted for review and approval.

### **Stay Informed and Get in Touch**

Valley Link is committed to transparency and ongoing communication as the project moves forward. Additional updates, meeting information and opportunities for public input will be shared as they become available.

Routing options under development will be available on the project website, where community members can view maps, learn more about the project and share feedback. If you have any other questions or would like more information, please contact the Joshua Falls–Yeat project team at:

(855) 617-6107  
[JF2Y@vltransmission.com](mailto:JF2Y@vltransmission.com)

[www.vltransmission.com](http://www.vltransmission.com)

Thank you for taking the time to review this information. We value your input and look forward to meeting with you as the Joshua Falls–Yeat project moves forward.

Sincerely,

**Robert Richardson**  
**Valley Link Representative**
