RE: Joshua Falls–Yeat 765 kilovolt (kV) Electric Transmission Line Project

Dear Community Member:

Thank you for your interest and participation in the Joshua Falls to Yeat 765 kV Electric Transmission Line Project. Over the past few months, the Valley Link team has met with landowners, elected officials, and other stakeholders to listen to concerns and gather feedback on the proposed routes. Recently, we completed the second round of open house meetings in counties crossed by the project. Nearly 1,000 community members attended these meetings to continue the conversations.

You have been a valuable part in the project development.

As we continue to evaluate route options, the team is compiling feedback and will work to develop a proposed route and alternatives that best minimize impacts to residents, environmental, historical and cultural resources and other assets to the greatest extent practicable. During a virtual meeting this fall, Valley Link will announce a proposed route and any alternate routes that will be submitted to the Virginia State Corporation Commission (SCC).

Ultimately, the SCC has final determination for how and along what alignment the project will be built.

As a reminder, current routes under evaluation can be found via GeoVoice, our online routing portal. A link to GeoVoice is on the project website, www.VLTransmission.com. Potential routes can also be found in physical map books at local libraries. Previous routing segments that are not part of the current routes are no longer under consideration.

The link to join the virtual meeting will be sent to you in a postcard and posted on the project website. Please continue to monitor the website for project updates.

A JOINT VENTURE OF

Thank you again for your involvement.

Sincerely,

A handwritten signature in black ink that reads 'Robert E. Richardson'.
