

Thank you to everyone who attended a Valley North Project open house!

Hearing from you is a critical piece of the project's development.

We value your input. Please submit your comments by **August 14, 2026**, so our team can review them during the study segment analysis. No route has been selected. Your feedback will help us make routing decisions.

There are multiple ways to share feedback:

- Use our online interactive map at **www.vltransmission.com/valley-north**
- Send us an email at **vlnorth@vltransmission.com**
- Call and leave us a voicemail with your feedback at **(304) 207-0120**

We will host another round of open houses to share the potential routes this fall. We're committed to keeping the process open and collaborative. We will continue to address general inquiries and engage with the community throughout this process.

If you were unable to attend an in-person open house, please visit the project website for a virtual open house, as well as resources including an interactive map of the study segments. ALL Open House materials are available in the virtual open house and you can submit any comments or questions through GeoVoice or the project e-mail address.

To stay informed and receive future project updates, we invite you to join our e-mail list on our project website.
