

# Open House Early Closures in Harrison and Preston Counties

**Due to severe weather conditions, tornado warnings and flood warnings, the open houses on July 21 hosted in Preston and Harrison Counties closed early.**

A virtual open house is available on the project website as well as resources including an interactive map of the study segments. ALL open house materials are available in the virtual open house and you can submit any comments or questions through GeoVoice or the project e-mail address. Comments submitted online will be considered and Valley Link will be hosting a second round of open houses later this fall for additional input on proposed routes. Impacted landowners will receive notification by mail.

Please submit your comments by **August 14, 2026**, so our team can review them during the study segment analysis. No route has been selected. Your feedback will help us make routing decisions.

We're committed to keeping the process open and collaborative. All the open house materials are available to view on our website in the resources section and in our virtual open house. We will host another round of open houses to share the potential routes this fall. We will continue to address general inquiries and engage with the community throughout this process.
